

75cm Minimal Volume

Sterile IV extension sets, 75 cm in length with one injection port and slide clamp for flow control.

This is minimal volume tubing with flow rates of approx 0.5ml per 30 cm of tubing.

Medical grade “memory” tubing is used- this resists kinking and helps prevent unwanted interruption to fluid flow

Connects to standard IV sets with a female universal adapter.

These sets DO NOT CONTAIN LATEX

****The adapter at the catheter end allows the set to be used as either a luer slip or a luer lock connection****

Min Order Qty(MOQ)=5000

Carton Qty=400
