

GlobalFlex Bandage

GlobalFlex "easy rip" bandage has all the normal characteristics of an elastic cohesive nonwoven bandage but now has the added benefit of being able to be torn by hand!!!

It tears easily and neatly straight across the bandage

no more looking for scissors.....

no more worrying about using sharp instruments around horses.....

It has an adhesion strength of ~ 350 which means it sticks strongly to itself but not to skin or fur

There are 12 rolls in a box

sizes available:

2.5cm

Min Order Qty(MOQ)=5000 rolls
